

Pool Pass Policy
Cypresswood Community Association
Updated 6/30/2008

Since the Cypresswood Community Association (CCA) pools are for the use of the residents, residents' immediate families, and residents' guests, the CCA board has adopted the following Pool Pass Policy.

All residents and immediate family members five years of age and older who plan to use the pools must obtain a pool pass from the Activity Coordinators at the East Clubhouse during regular business hours. The pool passes will be submitted to the life guard at the gate upon entering the pool area each day and will be returned when leaving the pool area.

Purchase and Validation of Pool Passes:

Pool passes cost one dollar and are good for three years. Each year the pool pass will need to be brought to the East Clubhouse to be validated before the pass holder will be allowed to use the pool. When the pass is validated the current year will be marked to show it is current. Pool passes will only be validated after the CCA dues are paid for the current year for that property owner.

Guests:

A Cypresswood resident in possession of a current pool pass may bring one guest into the pool area. Guests entering the pool area under this policy will not need to pay to enter the pool. Additional guests may enter the pool area with a Cypresswood resident in possession of a current pass when the resident presents a guest pass purchased from the Activity Coordinators in the East Clubhouse. These passes cost one dollar per guest per visit. Guest passes may only be purchased during regular business hours and are not available at the pool. These passes are sold as a punch card and may be purchased in differing denominations and do not carry expiration dates.

Please note:

Children four years of age and under do not require a pool pass or a guest pass.

Immediate Family is considered to be the resident or owners, their parents, their children, and their grandchildren.

Residents who are not the property owners will not be admitted until the owner pays the CCA dues.
